SECTION (1) **LOOS & CO.'S SEISMIC WIRE ROPE/CABLE BRACING** *** Advantages of Our Bracing ***

1-1

INTRODUCTION

1-2

- * General Description * Pre-stretched Assembly * Color Coded Sizes
- * Special Design & Installation Features *
- * Quality Assurance & Certified Break Strength * Codes & Standards *
- * Codes Compliance * Special Order Bracing *

1-3

STANDARD BRACE CONFIGURATIONS * Size-Mode-Fastener-Length *

1-4

BRACING & FASTENER SELECTION TABLES * Understanding & Using Tables *

1-5

BRACE & FASTENER SELECTION TABLES:

- Anchorage in CONCRETE STRUCTURE using the NO-PRY CLIP 1-8
- Anchorage in CONCRETE STRUCTURE using the URC or Stake Eye 1-13
- BOLTED Anchorage in STEEL STRUCTURE 1-18
- BOLTED Anchorage to STEEL BAR JOIST STRUCTURE 1-19
- CABLE LOOP Anchorage to STEEL BAR JOIST STRUCTURE 1-20
- THROUGH-BOLT Anchorage in WOOD STRUCTURE 1-21
- LAG SCREW Anchorage in WOOD STRUCTURE 1-22
- * #12 440 lb.+ Splayed Seismic Wire Rope/Cable Bracing (NFPA-13) 1-23
- * UNIVERSAL RESTRAINT CLIP (URC, URC48, URRCR, NO-PRY & EXAMPLES) 1-24

CONNECTIONS TO BRACED COMPONENTS:

1-30

- * Typical Field Connections * Use of Oval Sleeves and Thimbles
- * Extending Brace Length * Crimping of Oval Sleeve Connectors
- * Tools & Accessories *
- * Rod Stiffeners *

1-31

1-32

SECTION (2) **CODES & STANDARDS SEISMIC RESTRAINT REQUIREMENTS** *** Earthquakes * Applicable Model Codes & Standards ***

2-1

HORIZONTAL LOADS & LOAD FACTORS:

2-2

- * Horizontal Load Formulas * Magnitude of Horizontal Load * Amplification of load
- * The Bottom Line * Loos & Co.'s Solution *

LOOS & CO.'S SPECIAL DESIGN AND INSTALLATION USE AIDS:

- * Enlarged Seismic Zone & Activity Level (A_v) and %g Maps *
- * Horizontal Load Factor (HLF) Tables *
- * Brace Selection Tables *
- * Safety/Load Factor & Load Rating *

2-3

BASIC APPLICATION OF MODEL CODES & STANDARDS (Continued)

2-4

Table of Contents (Continued)

ADDITIONAL CONSIDERATIONS:	2-5
* Vertical Loads & Reactions * Essential Facilities & Life Safety Components/Systems	
KEY CODE COMPLYING DESIGN PARAMETERS:	
* Emphasis on Essential Facilities *	2-6
* Drift & Continued Operation *	
* COMPONENT BRACING EXCEPTIONS * (Facts & Myths)	
BASIC DESIGN PROCEDURE	2-7
* Strength Design vs. Allowable Stress Design *	
HORIZONTAL LOAD FACTOR (HLF) TABLES:	
1989/91 BOCA - NATIONAL BUILDING CODES	2-8
1988/91 SBCCI - STANDARD BUILDING CODES	2-8
1988/96 ICBO - UNIFORM BUILDING CODE	2-10
2001 OSHPD CODE (California Office of Statewide Health, Planning & Development)	2-10
1992/99 BOCA - NATIONAL BUILDING CODES	2-12
1992/99 SBCCI - STANDARD BUILDING CODES	2-12
1997 ICBO - UNIFORM BUILDING CODE / 2001 California Building Code (CBC)	2-14
TRI-SERVICES MANUALS-TM 5-809-10, NAVFAC P-366 & AFM 88-3, CHAP 13	2-20
2007 NFPA 13 STANDARD FOR AUTOMATIC SPRINKLER SYSTEMS	2-22
2000 IBC - INTERNATIONAL BUILDING CODE (ASCE 7-98) - NEHRP (FEMA)	2-26
2003 IBC - INTERNATIONAL BUILDING CODE (ASCE 7-02) - NEHRP (FEMA)	2-36
2006 IBC - INTERNATIONAL BUILDING CODE (ASCE 7-05) - NEHRP (FEMA)	2-52

APPENDICES

APPENDIX "A" (Tables of Physical & Mechanical Properties of Bracing & SMACNA/ASHRAE ref.)	A-1
APPENDIX "B" (PRINCIPLES OF EARTHQUAKE PROTECTION - Sprinkler System Illustration)	B-1
APPENDIX "C" (Vertical Loads & Reactions, Rod Stiffeners, Fastener Loading, Multiple anchors)	C-1
APPENDIX "D" (Amplification of Loads - Flexible & Flexibly Mounted Equipment)	D-1
APPENDIX "E" (Maximum Distance Between Braces, Bracing Locations & Weight Tables)	E-1
APPENDIX "F" (Seismic Zones for International Cities)	F-1
APPENDIX "G" (Why Specify Seismic Wire Rope/Cable™ Bracing - Recommended Specification)	G-1
CAD: (CAD Details and programs - www.earthquakebrace.com)	
SEISMIC MAP: (Accompanying Large Scale, Color Coded Seismic Map of U.S.A.)
